PROFILE SUMMARY

Diploma (D3) graduate in Informatics Engineering from Universitas Sebelas Maret with a GPA of 3.76/4.00 and four internships as a Full Stack Web Developer and Software Developer. Experienced in web application development, from database design and backend/frontend development to testing, debugging, and system maintenance. Accustomed to working carefully, responsibly, and adaptively with new technologies and work environments. Ready to contribute to the development and management of reliable, secure information systems that support business needs.

INTERNSHIP EXPERIENCE

Software Developer Intern

Perum Perhutani | November 2025 – May 2026

- Developed a web-based Lembaga Sertifikasi Profesi (LSP) system to support certification management and assessment processes across relevant units.
- Built user authentication and role-based access control features to secure data access according to user roles.
- Designed and managed a relational database to ensure data integrity and efficient information retrieval.
- Performed testing, debugging, and optimization to maintain system performance and usability.

Software Developer Intern

PT Kereta Api Indonesia (Daop 7 Madiun) | December 2024 – February 2025

- Developed a full-stack web application using Laravel 10 for product catalog management.
- Designed and optimized a MySQL database to improve system reliability and scalability.
- Applied MVC architecture and Laravel best practices to improve long-term system maintainability.
- Implemented CRUD functionality for the product catalog with auto-generated product codes to standardize data entry.
- Built a stock in/out transaction system and inventory reports with export features to PDF and Excel.

Full Stack Developer Intern

PT Garapan Indonesia Sukses | August 2024 – December 2024

- Developed a web-based online exam proctoring system using Flask and YOLOv8 for real-time detection of suspicious behavior via webcam.
- Implemented automated detection features such as looking away, multiple-person detection, and prohibited objects (smartphone, paper, etc.).
- Converted the camera and YOLO detection module into a standalone (.exe) application to simplify client-side deployment.
- Designed the backend architecture (Flask + SQLite) for managing participant data, exam codes, and proctoring records.
- Built an admin interface to monitor participant activity and display cheating evidence in real time.

Full Stack Developer Intern

PT Garapan Indonesia Sukses | February 2024 – June 2024

- Developed an integrated web platform for the prevention and management of baby blues in postpartum mothers.
- Contributed to writing the Software Requirement Specification (SRS) document to ensure clarity on user needs and system functionality.
- Designed UI/UX prototypes in Figma for seamless navigation and interaction.
- Implemented the frontend with React.js, ensuring a responsive design across devices.
- Built the backend using CodeIgniter 4 to manage data flow and secure user authentication.

FINAL PROJECT

ExamVision — Online Exam Application with YOLO-Based Suspicious Behavior Detection

Final Year Project | January 2025 – June 2025

- Developed an online examination system using Flask and a MySQL database, applying the SDLC methodology from planning through deployment.
- Integrated a YOLOv11-based proctoring system for real-time cheating detection.
- Implemented exam management features including randomized questions, per-question weighting, and result management.
- Improved exam integrity and efficiency by combining automated proctoring with exam management in a single platform.

EDUCATION

Diploma (D3) in Informatics Engineering

Universitas Sebelas Maret | 2022 – 2025

GPA: 3.76 / 4.00

CERTIFICATIONS

Programmer - BNSP

May 2025 – May 2028

Junior Web Developer - BNSP

September 2023 – September 2026

AWARDS

3rd Place - Web Technologies Competition Olimpiade Vokasi Indonesia IX

July 2024

SKILLS

Hard Skills

- HTML, CSS, JavaScript, PHP
- React.js, Vue.js, Next.js
- Laravel, CodeIgniter 4
- Python (Flask)
- MySQL
- Git / GitHub (version control)
- Figma (UI/UX prototyping)

Soft Skills

- Problem Solving
- Teamwork & Cross-Team Collaboration
- Discipline & Responsibility
- Time Management
- Attention to Detail
- Adaptable to New Technologies
